Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on December 10, 2004, was filed and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

5. Claims 5,6, and 10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim depends on claims 3 and 4, claim 6 depends on claims 3-5, and claim 10 depends on claims 8 and 9. See MPEP § 608.01(n). Accordingly, the claims 5,6, and 10 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "the holding means" (claim 1, line 4) or "the internal space" (claims 1 and 7). Moreover, the exact meanings of the recited phrases "the tongue in normal position is located in the same plane as the annular element is located in" (claims 1 and 7) are not clearly understood because the "plane for the annular element" is not previously defined.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1,2,6,7, and 10, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Carlson (3,273,927) (See IDS).

Carlson (3,273,927) discloses a golf ball retrieval device comprising a shaft 18, an annular element 20, having a substantially circular shape, a carrier 12 for the

annular element, and a tongue 26 extending into the internal space of the annular element.

10. Claims 1-4 and 6-10, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Ostrin (4,073,529).

Ostrin (4,073,529) discloses a golf ball retrieval device comprising a shaft 20, an annular element 32, having a substantially circular shape, a carrier 46 for the annular element, and a tongue 26 extending into the internal space of the annular element. A second tongue 28 is movable relative to the carrier.

11. Claims 1 and 3-10, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Fisher (1,452,679).

Fisher (1,452,679) discloses a golf ball retrieval device comprising a shaft 7, an annular element 2, having a substantially circular shape, a carrier 1 for the annular element, a first tongue 5 extending into the internal space of the annular element, and a second tongue 3 is movable relative to the carrier.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
